

REPORT ON IMPORTANCE OF ESSAY

Date: 24thOct, 2020

According to proposed plan of Konark Ideal College of Science and Commerce organised online essay competitions.

<u>An essay</u> is a writing technique used to persuade the reader of a certain point of view or to merely inform them on a certain subject. The term "essay" was first used by Michel de Montaigne, the Lord of Montaigne and a remarkable philosopher in 1571. He used the French word Essais, which means "attempt," to discuss his brief, philosophical compositions, which were the results of his immediate thoughts. Since then, compositions of the kind that Montaigne tried have been referred to as "essays."

In Essay writing, there have numerous crucial elements that are involved in other for the reader to be convinced or adequately informed. The introduction, body, and conclusion are the three basic portions of an essay. Five paragraphs in a typical short essay can give the reader adequate information in a condensed amount of time.

More than 26 students participated online and proved their creativity. Winners of essay competition are awarded by Certificates. The event has surely helped all the participants to encourage and motivate them. In addition to this, the event has enabled the students to boost up their knowledge apart from curriculum.
